

## Production Worker

Location: London

### The Company

3D Agriculture, a UK impact company founded in 2021, is combatting food insecurity and climate change through a rapid global rollout of thousands of vertical farms. 3D Agriculture develops and operates the most versatile, lowest cost vertical farms on the market. These grow both mushrooms and plants from the same platform, and an order of magnitude less per unit of production than the best vertical farms out there. 3D Agriculture has developed a farm that is deployable even in developing countries, where subpar logistics infrastructure creates high barriers to entry.

### Responsibilities

- Performs a variety of general labour and production work including but not limited to:
  - Packing & shipping duties
  - Transport materials to various departments within the facility
  - Provide quality checks on finished goods
  - Prepare racks for seeding
  - Ensure work areas are sanitized regularly
- All team members will have basic knowledge of tasks needed to be complete.
- Functions as a utility team member and work in various departments
- Rotational weekend work required

### Basic Qualifications

- High School Diploma or equivalent preferred
- Must be able to read, write, understand, and speak basic English (required)
- 6 months or more experience working within a production, warehousing, and/or manufacturing environment.
- General work experience will be considered in place of manufacturing experience. 3D Agriculture training provided.
- Be able to work in a cold environment (~3 Degrees Celcius) for long periods of time
- Availability to work one weekend day; Saturday or Sunday.
- Ability to respect and maintain confidential information
- Ability to work within a team environment
- Ability to lift, push, or pull up 50lbs

### Salary

- £10 per hour, paid weekly
- Shift: 6:50 am - 3:30 pm
